Our mission

From the beginning, New Relic has been focused on delivering a simple yet powerful way to give the world's developers an instant view of the performance of their software. CEO and founder Lew Cirne has always driven innovation for this market, most recently making New Relic One the industry's largest and most comprehensive cloud-based observability platform built to create more perfect software. Our ambition has driven us to instrument more of the digital world than anyone else. We exist to continue that work along the expanse of the internet, because our goal is to establish the standards by which all software and its impact can be measured and improved. That's a lot to do, but we're only getting started.

Real-time insights for modern digital initiatives

Improved Uptime and Performance

Deliver an exceptional digital customer experience that drives engagement, conversion and brand affinity.

Greater Scale and Efficiency

Migrate workloads to the cloud to gain scale, flexibility and access to cutting edge capabilities while freeing up engineers so they can focus on more strategic initiatives.

Accelerated Time to Market

Empower teams with data and tools to support faster feature delivery, faster recovery, and more experimentation to drive competitive business advantages.

Applied Intelligence

Full-Stack Observability

Telemetry Data Platform

Innovation highlights

- 1.3** TRILLION DATA POINTS queried per minute or 4,000x the number of tweets generated per minute
- 220+** INTEGRATIONS including Kubernetes, Docker, serverless, and 30+ AWS services
- 8** PROGRAMMING LANGUAGES and
- 200+** FRAMEWORKS monitored
