

## SOLUTIONS BRIEF

# NEW RELIC FEDRAMP<sup>®</sup> HIGH AND DOD IL4

New Relic has announced its formal commitment to achieving FedRAMP High and Department of Defense (DoD) Impact Level 4 (IL4) authorizations on AWS GovCloud. As a leader in intelligent observability, this move reinforces our commitment to helping public sector customers modernize their digital environments with absolute confidence.

### WHY FEDRAMP HIGH AND DOD IL4

As the public sector transitions to cloud-native architectures, digital complexity has reached a critical inflection point. Agencies now require the most stringent security controls to manage sensitive unclassified and mission-critical data.

#### FedRAMP High

The most stringent FedRAMP security baseline, requiring more than 400 security controls. It is designed to protect the government's most sensitive unclassified data in cloud computing environments.

#### DoD IL4

Designed to support DoD Controlled Unclassified Information (CUI).

These authorizations allow agencies to standardize observability across highly regulated systems without sacrificing performance or visibility.

---

## The Solution

---

### EXPERT PARTNERSHIPS

To meet these strenuous criteria, New Relic is working with industry-leading experts.

→ **Coalfire Systems, Inc**

A premier advisory firm helping navigate rigorous federal security requirements.

→ **Schellman Compliance, LLC**

Serving as the Third-Party Assessment Organization (3PAO) with over a decade of FedRAMP assessment experience.

### INTELLIGENT ORCHESTRATION

The platform offers a secure orchestration layer to correlate logs, infrastructure, and applications—including end-to-end AI visibility—within a single telemetry platform.

## THE SOLUTION

**“ To support the government’s most sensitive workloads, agencies need a secure, intelligent orchestration layer. We are reinforcing our long-term commitment to public sector customers, helping them modernize and operate with confidence.**

Michael Frendo  
CHIEF TECHNOLOGY OFFICER  
NEW RELIC

### Next steps

New Relic is currently proceeding through the rigorous alignment, documentation, and independent assessment activities required for these authorizations. Our goal is to break compliance roadblocks and provide the intelligent observability needed to keep your mission moving forward.
